Search Notes

Protein Sequence Searches – February 2005

All of the sequence databases on ABSS have recently been updated.

- Please note that the curators of the UniProt database have purged some temporary accession numbers from the most recent version of UniProt. These sequences have been assigned new permanent accession numbers. The new UniProt record may not contain the previous temporary accession number.
- If you encounter an accession number from an older search run against UniProt (results file extension **.rup**) that can no longer be found in the database, the permanent record with the new accession number can be found by searching the old accession number in the UniProt Protein Archive database (uniPARC) at:

<http://www.pir.uniprot.org/database/archive.shtml>

If you have any questions regarding this information or your results, please contact any STIC searcher.

1 na 354
21 aa 5
22 aa 17
23 aa 11

Please do a commercial and interference sequence search on
SEQ ID NO: 1 and 21-26 of this application.

24 na 15

Please provide a paper copy of the results.

25 na 51
26 na 33

me

Thanks,
Minnifield,
